Peace Dollars

The Peace Dollar, minted from 1921 to 1928, and again in 1934 and 1935, is a significant coin in American numismatic history. Designed by Anthony de Francisci, the coin symbolizes peace after World War I, with its obverse featuring the Goddess of Liberty and the reverse depicting a bald eagle at rest with an olive branch. Although it was the last U.S. dollar coin struck for circulation in silver, today it is highly collectible and valued beyond its face value for its silver content and historical significance. The U.S. Mint issued a special collector's edition in 2021 to commemorate the 100th anniversary of the Peace Dollar design, indicating its enduring legacy. While not in regular circulation today, the Peace Dollar remains a treasured piece for collectors and a fascinating glimpse into America's past.
